

# Soffit. Fascia. No Wood!

A giant leap forward in the quest for the perfect building trim

One of the first areas of a building or home to fail and fall victim to the elements is the fascia and soffit. Leaking gutters and rain run-off set up the perfect environment for wood and wood-based products to fail. **NyloTrim** is impervious to moisture and will stand up to the weather without rotting or swelling. Contractors appreciate its consistency, ease of use, and reduced weight compared to other products.

- No rot or mildew
- Low Maintenance
- Paint your own color scheme, including dark colors.
- Contributes to LEED® points

#### Applications:

- Fascia
- Soffit
- Exterior Trim

# Nyloboard

*A green company reclaiming local resources*

Nyloboard's manufacturing facility is located just outside of Atlanta in Covington, Georgia. Our location near the carpet capital of the world gives us constant access to our primary raw material, recycled carpet fibers.

The key component used in the manufacture of Nyloboard products is 100% recycled carpet fiber. It is part of our company's mission to help stop the waste stream of carpet fiber that currently contributes billions of pounds of waste to landfills each year.

## *Why Nyloboard?*

Our products are unparalleled as alternative building materials for several reasons.

### — DURABILITY

Because it's made from 100% recycled carpet fibers, Nyloboard is moisture, mildew, mold, rot, and termite proof.

### — SUSTAINABILITY

Nyloboard is sustainable from beginning to end. Our manufacturing process is VOC free. Since our products contain no wood or wood products, they save the trees that would otherwise be dedicated to building projects.

### — VERSATILITY

We manufacture an array of specialized building materials, and we can also supply custom solutions for your special projects.

## *We're Ready When You're Ready...*

Nyloboard's products are available for purchase throughout the United States and Canada. Contact us for a distributor near you.

Nyloboard has a production supply of boards available for quick shipment for your project.

When your Nyloboard product arrives, you will be impressed by how easy it is to use.

- There are NO special tools required. Use the same conventional tools you already own.
- Because of Nyloboard's exceptional moisture resistance, there is no need for waterproofing or vapor barriers.
- Nyloboard can be stained, painted, laminated, or veneered with a variety of coatings and finishes.

- *Made with Recycled Carpet Fibers*
- *Contributes to LEED® points*
- *Lightweight Material*
- *Up to 24 foot lengths*
