

ZERO WORRIES

NyloDeck™

No Wood. No PVC. No Worries.
The New Generation of Green Building

WHY NYLODECK?

Creating decks from post-consumer carpet fiber.

Introducing **NyloDeck**, the only green decking material that is manufactured using **100% recycled carpet fiber** and is made to last. NyloDeck has a natural looking embossed texture, color-thru core, is UV protected, and will span 24 inches. NyloDeck is more rigid, lighter-weight, and easier to handle than wood-based composites and PVC decking. Superior strength and durability make it a natural solution for residential, commercial, marine and park applications.

It is part of Nyloboard's mission to help stop the waste stream of carpet fiber that currently contributes billions of pounds to landfills each year and use it to create superior products.

- Beautiful on the outside • Strong on the inside • Green all the way through
- No Moisture • No Mold • No Rot • No Termites • No VOC Resins • No Swelling
- Stain Resistant • Up to 24 foot lengths • Contributes to LEED points
- No Wood • No PVC • No Worries with a 25 year limited warranty

INSTALLATION

Due to superior screw retention, NyloDeck is easily installed with traditional fastening systems. There are no pre-drilling requirements or mushrooming concerns. A wide range of Industry-leading hidden fastener systems works exceptionally well with our optional edge grooved board.

NyloDeck is available in three attractive colors.

PRODUCT SPECIFICATIONS

- Nominal 1" x 5.5" available in 12', 16', 20' and 24' Lengths
- Mold Resistance (ASTM D 3274) 10 rating ▪ Fungal Resistance (ASTM D 1413) No decay
- Termite Resistance (AWPA E1-97) 10 rating ▪ Screw Retention (ASTM D 1037) 747lbf
- Span Rating: 24" on center ▪ Coefficient of friction (ASTM D1679) 0.61/0.67 (*exceeds ADA guidelines*)

No Wood. No PVC. No Worries.
