

Nyloboard, LLC Joins the North American Deck and Railing Association (NADRA)

Covington GA (May 25, 2011)- Nyloboard announced today that it has joined the North American Deck and Railing Association, a unified source for the professional development, promotion, growth and sustenance of the Deck and Railing building industry. Nyloboard's membership shows a commitment to support the decking industry, not only with its superior decking product, NyloDeck, but to also keep in line with its mission of being the market champion in customer value, customer satisfaction and company profitability.

Since 2004, NADRA has quickly become a recognized source for the consumer by providing information on deck safety, designs and decking products. For professionals (builders, manufactures, dealers, distributors and retailers), it means belonging to an association that is synonymous with quality, professionalism and as an opportunity to set themselves apart from others. NADRA raises the bar for the industry

"We are pleased to be a part of an association, who bridges the manufactures, builders and consumers together.", says Patrick Doyle, CEO of Nyloboard. "NADRA is a wise investment of our resources for both Nyloboard and the industry.", he adds. NyloDeck is the only decking material that is manufactured using 100% recycled carpet fiber, which sets them apart naturally. "Joining NADRA, proves that we entered the market with intentions on becoming a major player in one of the fastest growing industries.", says Kevin Guthard, VP of Sales and Marketing.

###

About Nyloboard:

Nyloboard is a manufacturer of composite products that contain no wood, PVC, or VOCs. Using an exclusive, patented manufacturing technology that utilizes only 100 percent recycled, post-consumer carpet fibers and VOC-free bonding resin. One of Nyloboard 's key goals is to help stop the waste stream of carpet fiber that currently contributes billions of pounds of non-reclaimable waste to landfills each year and use it to create superior products. Nyloboard also takes pride in manufacturing green building products that are not only sustainable, but also impervious to moisture, rot, termites, mold and mildew. Nyloboard 's manufacturing facility is located in Covington, Georgia, just outside of Atlanta.
